

Add this immediately after the "UI / UX Design Expectations" section and before "Main Modules".

Sidebar Navigation Requirements

Use a hierarchical sidebar with Section Headings + Submenu Items instead of a flat menu.

Example sections: Overview, Portfolios, Investments, Analytics, Goals & Planning, Reports, Integrations, Alerts, Documents, Admin.

Support:

Expand/Collapse sections

Icons for all menu items

Active state highlighting

Search within navigation (Ctrl+K / Command+K)

Favorites/Pinned items

Responsive mobile drawer

Navigation should feel similar to eToro, TradingView, INDmoney, Stripe Dashboard, and Linear.

Avoid traditional admin-panel sidebars and flat navigation structures.
